Marianne,

I wanted to write a letter to let you and your company know how much I appreciate the way Standard Signs has treated the Des Moines Airport. If we have a sign run over by snow plows or mowers, I can always count on you to get my sign panels to me in the next day with your Wait-Less program.

Your sign are very well constructed, we have never had any problems with jet blast. Over the years we have added modules to signs, they always fit together.

Again thanks for the many years building a quality product in a timely manner.

Larry R. Thompson
Chief Aviation Electrician
Des Moines International Airport
